CONNECTING THE NEXT GENERATION

Keeping You In The Loop - June 2022

TLC is EXPANDING!!

TLC is very excited to have broken ground on Monday May 2nd. The new building addition is estimated to be completed in August of 2022. It will take an additional month for utilities to be installed.

The purpose of the new building will be a finished goods warehouse. The existing warehouse will be emptied to allow more room for additional wire & cable extrusion lines with the near-term plan to include equipment to manufacture both finished goods and tight buffer.

Ask Engineering

The Light Connection, Inc. proudly welcomes Cristian Peraza to the Engineering Team as a Process Engineer.

This is an integral role within the Company, where daily functions include assisting Manufacturing, Quality, and Sales. The Engineering Team works daily with customers to provide custom solutions on time.

Cristian Peraza has a Bachelor of Science in Mechanical Engineering from SUNY Polytechnic Institute. His wealth of knowledge and extensive course load will prove valuable to TLC and our customers' success both now and for years to come.
